

Worried about AI projects failing?

Datavid Rover is the **Semantic Search Platform + Enrichment Engine** that facilitates FAIR data and makes fragmented enterprise data trusted, actionable, and AI-ready.

Datavid Rover lets you roll out an **MVP** of your project **in 6-8 weeks.**

Built for Today. Ready for What's Next.

WHY DATAVID ROVER

As experts in complex data product delivery, Datavid rolled best practices into one extensible and durable Semantic Search platform designed to make sense of document files – out-of-the-box. It's also a Semantic enrichment engine that allows you to iteratively add intelligence – to meet the needs of tomorrow. Datavid Rover makes your data AI-ready – no need for a huge overhaul.

“We waited more than two years for internal teams to create our compliance system. Datavid, with Datavid Rover, did it in under 10 weeks.”

- Data Officer,
Life Sciences Company

CONNECT

- Connects to existing data stores and ERPs
- Ingests documents, PDFs, and structured data
- Integrates all legacy data

CREATE

- Enriches source data to build an enterprise information asset
- Adds your ontologies
- Extracts entities, builds metadata and knowledge graph automatically
- Accelerates agile delivery with an out-of-the-box UI—enables iterative development and end-user feedback within days

CONSUME

- Delivers cognitive search capabilities out-of-the-box
- Adds LLMs and chatbots securely for enterprise search
- Powers LLM responses with GraphRAG architecture
- Builds agentic AI workflows
- Presents insights with out-of-the-box analytics and visualisation tools

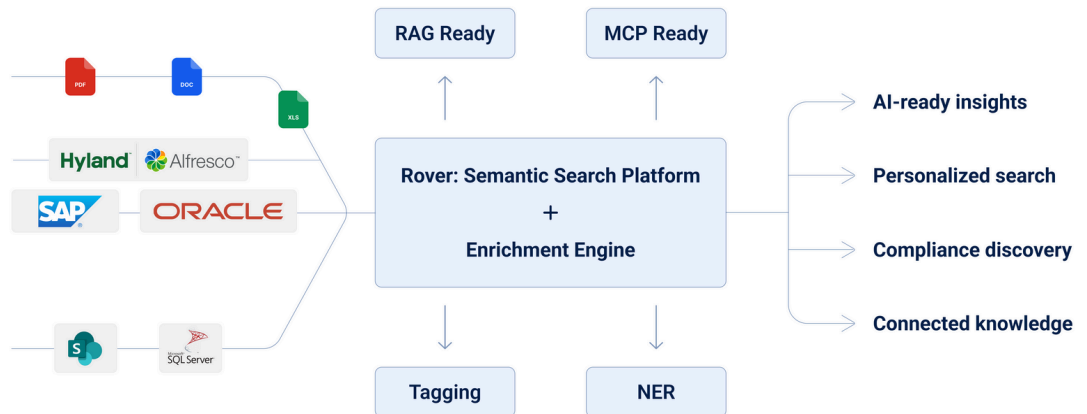

Powered by Experts from Datavid

Datavid has successfully delivered advisory and software development projects for our enterprise customers.

We designed Rover to be an accelerator. Combined with our know-how, we help you get your data products and projects to market faster.

From Chaos to Context

Datavid Rover accelerates taking fragmented data to actionable knowledge

Datavid is the team behind Datavid Rover. For **7 years** Datavid has focused on the evolving agenda of CDOs.

Providing clean, accurate, and integrated data

Establishing governance and data architecture

Delivering semantic and enterprise search platforms

Integrating AI & LLM, safely

WHY CDOs CHOOSE DATAVID ROVER

Datavid Rover reduces the need for specialist internal resources or infrastructure changes

Datavid Rover helps CDOs deliver value to the business stakeholders, fast:

- Clean, accurate data that is AI-ready, allowing safe LLM implementations
- Rapid development of business use cases such as
 - New data products
 - Operational efficiencies
 - Compliance applications
 - Enterprise search for knowledge workers
 - Chatbot access to internal knowledge bases (HR, code of conduct, technical documentation, etc.)
- MVPs delivered in 8 weeks!

FACING THESE QUESTIONS WITH EVERY AI PROJECT?

CDOs are under pressure to deliver results, but key challenges keep slowing momentum:

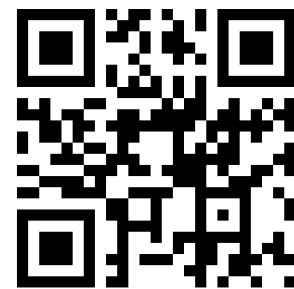

- What's the real business value - cost savings, new revenue, or faster insights?
- Is our data AI-ready and properly governed?
- Do we have the right skills, time, and architecture to deliver?
- How do we avoid PoC fatigue and actually go to production?

Datavid Rover helps you cut through the complexity and get to value - faster.

**Ready to move from questions to outcomes?
Datavid Rover delivers from scope to MVP in 6-8 weeks.**
